CORE COMPETENCIES

- Performance Optimization
- User Experience Design
- Front-End Architecture & Design
- Software Development Life Cycle
- Responsive Web Development
- Cloud Computing Concepts
- RESTful API Integration
- Component-Based Development
- Performance Optimization & Tuning
- Testing & Debugging
- Agile & Scrum Methodologies

TECHNICAL SKILLS

- HTML
- CSS
- JavaScript
- NextJS
- JQuery
- SAAS
- ReactJS
- Redux
- Bootstrap
- AI & Automation
- Tailwind
- JIRA
- Typescript

ROHAN CHAUHAN

Senior Software Engineer

PROFILE SUMMARY

- A result-oriented professional with **over 5 years of experience in Software Engineering, specialization in Front-end Development**, showcasing a deep knowledge of contemporary Web Technologies and Frameworks.
- **Working as a Senior Software Engineer at Kellton Tech**, orchestrating the development of significant projects and engaging with cross-functional teams to produce outstanding software solutions.
- **Awarded “Champion of the quarter” certificate for exceptional performance in current position at Kellton tech for Spot Recognition in Q1 2025.**
- **Proficient in modern web development practices with strong expertise in ReactJS, Next.js, and TypeScript**, complemented by working experience in AI-assisted development using Claude, including prompt engineering, AI agent workflows, and automation to improve development productivity and problem-solving.
- **Hands-on experience building AI-powered workflows, creating reusable prompts, and developing AI agents using Claude** to automate development tasks, accelerate debugging, generate code, and improve engineering efficiency.
- **Earned accolades for exceptional performance** in current position, receiving an internal appreciation letter in 2023 for project success & fostering team collaboration.
- **Exhibit robust analytical capabilities and a proactive mindset towards problem-solving**, empowering the capacity to independently investigate and address intricate technical challenges without external support.
- **Showcase expertise in applying caching strategies and performance enhancements**, guaranteeing the delivery of high-quality, efficient web applications that align with user requirements and business goals.
- **Uphold a dedication to ongoing learning and professional growth**, remaining informed about the latest industry trends and technologies to refine software development methodologies.

WORK EXPERIENCE

Kellton Tech, Gurugram | Since July 2022
Senior Software Engineer

Key Result Areas:

- Spearheading the development of innovative web applications, utilizing cutting-edge technologies such as ReactJS, NextJS, and Typescript to create responsive and user-friendly interfaces.
- Collaborating with product managers and designers to gather requirements and translate them into technical specifications, ensuring alignment with business objectives and user needs.
- Conducting thorough code reviews and implementing best practices for code quality, including the use of SonarQube for static code analysis and linting to prevent errors.
- Managing version control and project tracking through Git and JIRA, facilitating seamless collaboration among team members and maintaining project timelines.
- Developing comprehensive documentation for software solutions, ensuring clarity & ease of understanding for future reference and onboarding of new team members.
- Engaging in continuous performance monitoring and optimization of applications, employing caching techniques to enhance load times and overall user experience.
- Mentoring junior developers, providing guidance and support in their professional growth while fostering a collaborative team environment.
- Leveraged Claude AI for prompt engineering and AI agent development to automate repetitive engineering tasks, accelerate debugging, improve code quality, and streamline development workflows.

Tech9logy Creators, Faridabad | February 2021 to July 2022
Web/ React Developer

EDUCATION

- ● BCA from DAV Institute of Management, Faridabad in 2020

PERSONAL DETAILS

Date of Birth: 1st August 1998

Languages: English & Hindi

Address: Faridabad, India

Key Result Areas:

- Developed and maintained high-quality e-commerce web applications, implementing features such as dashboards, wallets, & subscription services to enhance experience.
- Collaborated with cross-functional teams to design and implement layouts using React, Redux, and SCSS, ensuring compatibility across various devices & browsers.
- Integrated payment gateways such as Razorpay and Paytm, facilitating secure transactions and improving the overall functionality of e-commerce platforms.
- Created data visualization components, utilizing charts and graphs to present analytics in a user-friendly manner, aiding in informed decision-making for clients.
- Engaged in regular communication with stakeholders to gather feedback and iterate on product features, ensuring alignment with user expectations and business goals.
- Conducted performance testing and optimization of web applications, identifying bottlenecks and implementing solutions to enhance load times and responsiveness.
- Maintained comprehensive documentation of development processes and project specifications, ensuring clarity and consistency for future reference.

ENTREPRENEUR EXPERIENCE

Web Developer | July 2019 to February 2021

Key Result Areas:

- Designed and developed front-end solutions for various clients, focusing on creating visually appealing and functional websites tailored to client specifications.
- Utilized a range of technologies including HTML, CSS, JavaScript, and React to build responsive and interactive user interfaces for diverse applications.
- Collaborated with clients to understand their requirements and provide tailored solutions, ensuring satisfaction and alignment with their business objectives.
- Implemented API integrations to enhance website functionality, enabling seamless data exchange and improved user experiences.
- Conducted thorough testing and debugging of web applications, ensuring optimal performance and user satisfaction prior to deployment.
- Maintained version control using Git, facilitating collaboration and tracking changes throughout the development process.

PROJECTS

ONDC | Since June 2023

- Developing ONDC, a government digital commerce platform connecting buyers and sellers. Implemented caching, optimizations, and performance enhancements. Tech stack: React/Redux, Tailwind, Styled Components.

Zuno, (Edelweiss Insurance) | July 2022 to June 2023

- Built an insurance platform using Next.js and TypeScript for purchases and renewals, following Agile methodology.

Krishi Cress, (krishicress.com) | February 2021 to July 2022

- Developed a React.js e-commerce site for vegetables with SCSS and Redux; integrated Razorpay, subscriptions, wallet, credit, loyalty, and referral features.

WalletCore, (designprogress.in) | July 2020 to October 2020

- Created a crypto dashboard supporting login/signup, password management, API keys, wallet addresses, and balance transfers.

DexLabs, (designprogress.in)

- Designed and implemented an 8-page website including homepage, presale, and staking functionalities.

Pokemon City, (designprogress.in)

- Developed an NFT marketplace enabling users to buy and sell digital cards.
